Perfecting High-Performance

High Quality Reproduction...

At Parrot we strive for excellence in digital capture and limited edition printing. Our process utilizes the world's best digital capture and inkjet printer technology, a comprehensive range of ink, media and coatings all optimized with Parrot color managed workflows.

The result – unparalleled digital capture and art reproduction.

Original Artwork

You provide the masterpiece. Parrot inspects the artwork to determine the best digital methodology for capturing your work. We take special care to assure proper handling and storage of your artwork.

Scanning & Digital Capture

Our Cruse flatbed scanner can scan high-resolution B&W and color imagery up to 48"x72" in a single scanning pass.

Larger images can be stitched if required. We can also scan multiple images simultaneously.

Film and Reflective Media:

Parrot can scan B&W and color negatives, transparencies, reflective prints and line art on our high-resolution scanner at up to 5500dpi resolution.

Color Management

Our scanners, monitors and printers are calibrated with the most capable color management software available. Parrot pioneered and optimized color-managed workflows that assure accurate capture, soft proofing and accurate and repeatable limited edition prints.

th-Performance

Artist Proof

Parrot prints an artist proof for sign-off by the client. The artist proof is the reference standard for the limited edition. We also offer image editing services.

Limited Edition Giclée

Limited edition prints are available on photobase, watercolor paper, canvas and fabrics. Other media types are available on request.

Equipment and Systems

Parrot has been providing turn-key image capture and printing systems since 1997. We also provide scanners, digital cameras, scanbacks, printers, color management solutions, and accessories.

Consumables

Parrot offers a complete range of media, inks and coatings designed and certified for high resolution imaging applications. We offer both manufacturer branded products and Parrot products. Parrot's media line has become the gold standard for performance, consistency and long-term archival stability.

Installation and Training

Many of our clients have benefited from our on-site installation and training, our telephone-based technical support programs, and technical seminars. We tailor installation and training based on the application and technical knowledge of the client. Whether novice or advanced user, Parrot has training and technical support programs that will be beneficial and cost-effective.
