

EPSON Professional Media

Photo Glossy Paper

For Use With:

EPSON Stylus® Pro 7000
 EPSON Stylus Pro 7500
 EPSON Stylus Pro 9000
 EPSON Stylus Pro 9500

Product Information

Photo Glossy Paper is an instant-drying, high-gloss paper with a resin-coated (RC) base. The RC base allows the paper to maintain vivid, lifelike colors that rival traditional prints. A favorite among photographers and graphic artists, its non-cockling characteristics make it ideal for photographs, promotional pieces, layouts, portfolio images, proofs, displays and posters. It creates high-quality prints by offering maximum ink coverage with brilliant color inks that dry in an instant. This paper can also be easily laminated to provide protection from light and moisture.

Like all of Epson's innovative media, this paper is engineered to give you the highest resolution and color saturation possible. Epson's printer driver software actually optimizes the amount of ink released onto the page, based on the type of paper used. As always, EPSON supplies guarantee EPSON quality.

Features/Benefits

- Highest color gamut available for vivid color reproduction
- RC paper-base for non-cockling prints
- Glossy finish for photo-like reproductions
- 1440 dpi printing for high-quality output
- Dries instantly for easy handling with Epson inks
- Versatile and easy to laminate for most applications
- 100' roll for increased productivity

Feature Checklist

Feature	Performance	Additional Comments
Indoor/outdoor usage	Indoor use only	
Lightfastness	140 years (only when using EPSON Archival™ Inks) Six months (with dye-based inks)	Lightfastness ratings are based on accelerated testing of prints on specialty media, displayed indoors, under glass. Lightfastness only estimates the life of the ink, not the media.
Gas-fastness	Excellent with EPSON Archival Inks; poor with dye-based inks	Lamination greatly increases gas-fastness.
Archivability	Good	It is not recommended that unprotected prints be displayed for long periods of time, as the color may change due to atmospheric conditions.
Resistance to water	Good	Bleeding does not occur with incidental water contact. However, this paper is not recommended for use in wet conditions.
Ink drying time	Immediate (less than 30 seconds)	Ink is dry to the touch after printing. However, it takes 24 hours before it cures and becomes durable.
Lamination feasibility	Hot lamination or cold lamination	Lamination will extend the life of the print.

NOTE: Actual print stability and longevity will vary according to image, display conditions, light intensity, humidity, atmospheric conditions, and post-printing treatments. Epson does not guarantee stability or longevity. For maximum print life, display all prints under glass or lamination or properly store them.

Professional Media Photo Glossy Paper

Technical Specifications

Basis weight	170 g/m ² 155 g/m ² (36" /44")
Thickness	7 mil 6 mil (36" /44")
ISO brightness	98%
Opacity	90%
Gloss at 60°	42
Hot lamination	Yes
Base material	Polyethylene Encapsulated Paper
Surface finish	Glossy
Core size	2"
Spindle	2" standard
