### Product Information

EPSON Premium Semigloss Photo Paper is an RC (resin coated) based paper that is used with both Epson Archival™ and Epson Photo Ink, making it a versatile choice for professionals looking for flexibility without compromising quality. This media is ideal for creating long lasting, photographic color prints. Its incredible lightfastness, brilliant color reproduction and heavyweight base work together to produce prints that not only look and feel like standard photographs but have similar durability.

When used with an EPSON Stylus Photo 870, 1270 or 875DC printer and EPSON Photo Inks, this paper generates prints with a life expectancy comparable to those processed in a photo lab. When used with an EPSON Stylus Photo 2000P printer and EPSON Archival™ Inks, it delivers prints that will last over 100 years before any fading occurs\*.

EPSON Premium Semigloss Photo Paper is the perfect choice for any photographs requiring an elegant semigloss surface. The printer/paper/ink combination yields a tremendous tonal range, from incredible shadow detail to full highlights, and the photo base ensures a high D-Max.

\* Lightfastness rated 100 or more years before noticeable fading occurs in normal florescent indoor lighting, under a glass frame, when using Genuine EPSON Archival™ Inks and EPSON Premium Photo Papers. Results will vary depending on lighting conditions, humidity, color intensity and color range.
