## UV Protective Top Coat\*

Applying a top coat increases the life of a print by reducing UV exposure and offers increased durability to the surface. The **Universal Clear Coat** may be applied to most substrates (watercolor, photo, gloss canvas, etc.). This top coat does not change the look or finish of the print. Watercolor papers should be treated with care as scratch and scuff protection is not enhanced by the **Universal Clear Coat**. The **Canvas Coat** may be applied to canvas and vinyl products only. **Canvas Coat** enhances color saturation, durability, and elasticity which prevents cracking and edge separation during stretching. Our print specialists will help you select the best topcoat for your masterpiece.
